Global Temperatures:
Global Climate Change Module

EXPLORING the **ENVIRONMENT** GLOBAL CLIMATE CHANGE

The earner of this badge has:

1. Analyzed data and identified trends in global mean temperatures.

2. Described impacts of global temperature changes on humans, wildlife, and ecosystems.

3. Proposed sources of the changes above, and supported these proposals with data.

4. Proposed strategies to lessen/mitigate the changes described above, the time for them to make a difference, and the pros and cons of each strategy.

5. Created and delivered a report (video, presentation, etc.) of all the information accumulated above.

Related Activities:
You may also want to examine the data in the Exploring the Environment module,
Ice Caps and Sea Levels: http://ete.cet.edu/gcc/?/icecaps/

Or try some of these NASA opportunities for grades 9-12: http://goo.gl/wnqo

Current Activities:
Exploring the Environment module,
Global Temperatures: http://ete.cet.edu/gcc/?/globaltemp/

EFFORT   Spent a minimum of 5-10 hours on this data analysis module.
